HIGH PERFORMANCE BUILDINGS FOR LIFE™

3606 Horizon Drive
King of Prussia, PA 19406
P: 610.962.1600 F: 610.962.0230

www.tozourenergysystems.com

BACnet www.bacnet.org

Solution Provided: We are well-versed in the integration of various products that use BACnet. BACnet is a data communications protocol for **B**uilding **A**utomation and **C**ontrol **N**etworks.

Building Logix www.buildinglogix.net

Solution Provided: Our Building Logix partner, powered by Niagara, delivers open integration products and special applications to deliver the power of the Internet combined with the ultimate in web services. These services include operational dashboards and system diagnostics as well as predictive modeling for maximum equipment and building performance.

Distech Controls www.distech-controls.com

Solution Provided: Distech Controls manufactures open and scalable building automation products, promoting an energy efficient and environmental design of buildings worldwide. Our intuitive and innovative solutions provide for optimized energy management strategies and reduced building automation systems' lifecycle cost.

EFT Control Systems www.eft.ie

Solution Provided: EFT is a company specializing in automation and process control. They utilize a deep understanding about industrial operations and data capture with highly skilled software developers in EFT Control Systems. This ultimately led to the development of what is today the clear market-leading energy management solution. This enables EFT Control Systems to provide its clients with a turnkey energy management solution that has been developed around real customer requirements.

LONMARK®

LonMark International www.lonmark.org

Solution Provided: We are well-versed in the integration of various products that use LON. LonMark International is a global membership organization created to promote and advance the business of efficient and effective integration of open, multi-vendor control systems utilizing ISO/IEC 14908-1 and related standards. ISO/IEC have approved the LonWorks platform to the highest level of international standards recognition.

Trane www.trane.com

Solution Provided: Trane controls are the keystone to making a building work better for life. They are engineered to be user-friendly and help building owners efficiently achieve their desired temperature, humidity and ventilation, whatever the building's purpose.

Tridium Niagara^{AX} www.tridium.com

Solution Provided: Niagara^{AX} is a software framework specifically designed to address the challenges of building device-to-enterprise applications, Internet-enabled products and Internet-based automation systems. Niagara^{AX} provides a unified, feature-rich platform that streamlines the development process, significantly reducing implementation costs and time to market. Niagara^{AX} creates a common environment that connects to almost any embedded device imaginable, regardless of manufacturer or communication protocol. Niagara^{AX} models the data and behavior of the devices into normalized software components, providing a seamless, uniform view of device data to the enterprise via a wide variety of IP-based protocols, XML-based connectivity options, and open API's.

Ywire Technologies Inc. www.ywiretech.com

Solution Provided: YWire has become the first manufacturer to implement Broadband over Power Line (BPL) data networks into building systems. Founded by three highly experienced industry professionals, YWire is able to view the building controls market from unconventional perspectives—which has ushered in new technologies to a mature community. YWire is also the first to implement IP connectivity at the device level, truly a major milestone in the evolution of intelligent devices connected to the smart grid.
